

Microsoft Certified Master Program

The Microsoft Certified Master (MCM) program offers exclusive, advanced training and certification on Microsoft server technologies to seasoned IT professionals. Complete the program and you can help validate your skills as a technology expert who successfully designs and implements solutions that meet the most complex business requirements. Do you have what it takes to become an MCM?

Special Offer: Retake an exam for free

Sign up today for your Second Shot exam or exam pack and, for a limited time, you'll be able to retake any exam you don't pass the first time—at no extra cost. And if you purchase a certification pack of exams, you can save up to 15 percent in addition to getting a second shot.

Microsoft Certified Master Program Overview

Exclusive, advanced training

The strength of the MCM program relies on experience-based curricula made up of expert-level classroom training and labs. The curricula are presented by instructors from Microsoft and partner organizations—experts in their disciplines who draw upon real-world scenarios to ensure that students learn the most relevant, applicable skills.

- [Learn more: attend webcasts led by MCM program management](#) **New**
- [Read a case study about the value of having MCMs on staff](#)

Due to the growing global demand for an MCM certification for SQL Server 2008 and for Exchange Server 2010, we have made changes to the MCM program to ensure that SQL Server and Exchange Server experts who want to help validate their in-depth technical skills can do so.

- [New Path to MCM: Microsoft SQL Server 2008](#)
- [New Path to MCM: Microsoft Exchange Server 2010](#)

Certification

MCM certification helps experienced IT professionals to deepen and broaden their technical expertise on Microsoft server products and helps them stand out to employers and customers. The MCM program includes three weeks of highly intensive classroom training, three computer-based tests, and one lab-based exam per training rotation (training and exam series).

There are five MCM certifications:

- [Microsoft Certified Master: Microsoft Exchange Server 2010*](#)
- [Microsoft Certified Master: Microsoft Lync Server 2010](#)
- [Microsoft Certified Master: Microsoft SharePoint Server 2010](#)
- [Microsoft Certified Master: Microsoft SQL Server 2008*](#)
- [Microsoft Certified Master: Windows Server 2008 R2: Directory](#)

*Training is optional for this MCM certification.

MCM certification is a prerequisite for all Microsoft Certified Architect (MCA) certifications.

- [Learn about MCA certifications](#)
- [Learn more about the SSAS Maestro program \(for SQL Server architects and consultants\)](#)

Certifications and Prerequisites

To achieve MCM certification, candidates must:

- Complete the following prerequisite exams and certifications.

Note Completion of prerequisites does not guarantee admission into the MCM program or attainment of the MCM certification.

- Attend the required two- or three-week training program and pass the corresponding computer-based Knowledge Exams and a Qualification Lab Exam.

Note Although training attendance in Redmond is not required to achieve MCM: SQL Server or MCM: Exchange Server certification, completion of their respective readiness activities is highly recommended.

**This exam is retired, but if you already passed it, you can apply it toward this certification.

Registration

Apply and register

To apply for and register to attend an MCM program rotation, follow this procedure. After each step, you will receive notification about your eligibility or acceptance into the program and your next steps.

- Complete the brief application.** A non-refundable US\$125 application fee is required.
- Upload your resume or curriculum vitae (CV) and other supporting documentation within 60 calendar days.** Applicant credentials are reviewed by the MCM program leads to determine eligibility.

Note If we are unable to determine your eligibility based on the documents you submitted, you might be contacted for a 30- to 60-minute interview.

3. **Register: Pay in full, and choose your class dates after acceptance into the program.** If accepted into the program, you receive details about the training session and a recommended reading list to help you prepare. There is a high correlation of success for those candidates who have completed the recommended pre-reading or have considerable experience with the concepts covered, compared with those who have not.

Note The above registration process does not apply to registering for the required MCM: SQL Server 2008 exams or the MCM: Exchange 2010 exams. To register, simply go to the Prometric website to schedule your MCM Knowledge Exam. To register for the optional MCM: Exchange 2010 training, use the above registration process and link. [Register for the MCM Knowledge Exam](#) (Prometric.com)

Attend the training program

Each Microsoft-delivered training rotation session is held in Redmond, Washington. Candidates are responsible for all associated travel costs. It is highly recommended that candidates clear all engagements and commitments throughout the scheduled training due to the rigorous program schedule. During training, up to three computer-based Knowledge Exams will be administered, each of which covers subjects discussed in class. Candidates must also successfully complete all lab exercises to obtain certification.

Additional policies:

- Candidates can retake each of these exams up to two times after training is completed. There is a 45-day waiting period prior to the second attempt, and a 90-day waiting period prior to the third attempt. Retakes must be completed within one year of attending the training or before the first delivery of the next version of the training, whichever is later. Retakes can be taken remotely.
- For candidates who do not finish the training or pass the exams after the three attempts, the only way to earn the MCM certification is to retake the training session (after further developing their skill sets, based on program manager feedback). Candidates who retake the training must pay the full program cost.

Note The MCM: Microsoft SQL Server and MCM: Microsoft Exchange Server programs do not require mandatory attendance of training to obtain certification. Training is highly recommended but not required.

Pass the Qualification Lab Exam

The Qualification Lab Exam is administered on the final Saturday of the training session. Candidates who do not pass the lab exam the first time can schedule up to two subsequent attempts (to be taken remotely). The first retake is generally available within three months of the initial attempt. There is a six-month waiting period required prior to the second retake. Retakes must be completed within one year of attending the training or before the first delivery of the next version of the training, whichever is later.

Note If you have a disability that might require special equipment or other accommodation in order for you to participate in the training program or complete the exams, contact mcmprog@microsoft.com prior to submitting your registration. The MCM program is committed to making all reasonable efforts to accommodate candidates with disabilities.

Note Candidates who choose not to attend the optional training rotation for MCM: Exchange Server can schedule their Lab Exam after passing the Knowledge Exam at Prometric, as can MCM: SQL Server candidates.

Schedule

The following rotations (training sessions with exams) are currently scheduled for the MCM program.

Important: Registration deadline for a rotation is two calendar weeks prior to the indicated rotation start date.

Program	July – September 2012 offerings	October – December 2012 offerings
MCM: Microsoft Exchange Server 2010 ¹		Nov 25–Dec 15 Final Exchange Server 2010 delivery*
MCM: Microsoft Lync Server 2010	Sept 9–29	Nov 25–Dec 15 Final Lync Server 2010 delivery*
MCM: Microsoft SharePoint Server 2010 ²	Aug 5–25 Standard Delivery Final SharePoint Server 2010 delivery*	
MCM: Microsoft SQL Server 2008 ³	Training is offered through Microsoft Learning Partners	
MCM: Windows Server 2008 R2: Directory	Sept 9–23 Final Windows Server 2008 delivery*	

*Master level training and certification for Windows Server 2012, Exchange Server 2013, Lync Server 2013, SharePoint Server 2013, and SQL Server 2012 are being offered through the new Microsoft Certified Solutions Master (MCSM) certification program, the successor to the MCM certification. The first two MCSM certifications released will be for SQL Server 2012. [Check here for updates](#) on training schedules and certification paths for the latest product versions.

¹Training attendance for the MCM: Exchange program is highly recommended but is not required to obtain MCM certification. See the New Path to MCM: Exchange Server page for a list of preparation resources.

- [Learn more about the new path to MCM: Exchange Server 2010](#)

²Microsoft is offering a new format for the MCM: SharePoint rotation. Starting in January 2012, the rotation will include one week of required in-person training in Redmond, Washington, followed by 10 weeks of required virtual classroom attendance two times per week for four hours each session. Access to practice labs and the administration of one attempt for each required certification exam are included.

³Training and other readiness activities for the MCM: SQL Server certification are highly recommended but are not required to obtain an MCM certification. See the New Path to MCM: SQL Server page for a list of preparation resources.

- [Learn more about the new path to MCM: SQL Server 2008](#)

Note Training dates, product versions, program requirements, and pricing are subject to change at the sole discretion of Microsoft. If a candidate has been approved for the MCM program on a prior version of the product, he/she will need to reapply and meet all prerequisites for the new version.

Upgrade Rotation Schedule

Program	July – September 2012 offerings	October – December 2012 offerings	January – March 2013 offerings	April – June 2013 offerings
MCM: Microsoft Exchange Server 2010	Currently, no additional upgrade rotations are offered for this program. Candidates can either attend a full training rotation at the upgrade price or pass the two required exams available through Prometric. ■ Register on the Prometric website			
MCM: Microsoft Lync Server 2010	Currently, no additional upgrade rotations are scheduled for this program. Candidates who want to upgrade must attend a full training rotation at the upgrade price and pass the required exams.			

Program	July – September 2012 offerings	October – December 2012 offerings	January – March 2013 offerings	April – June 2013 offerings
MCM: Microsoft SharePoint Server 2010	Currently, no additional upgrade rotations are scheduled for this program. Candidates who want to upgrade must attend a full training rotation at the upgrade price and pass the required exams.			
MCM: Microsoft SQL Server 2008	Currently, no additional upgrade rotations are scheduled for this program. Candidates who want to upgrade must pass the Knowledge Exam for MCM: SQL Server 2008 now offered at select Prometric locations. ■ Find a Prometric location near you (PDF file, 65 KB)			
MCM: Windows Server 2008 R2: Directory	Currently, no additional upgrade rotations are scheduled for this program. Candidates who want to upgrade must attend a full training rotation at the upgrade price and pass the required exams.			

Note Training dates, product versions, program requirements, and pricing are subject to change at the sole discretion of Microsoft. If a candidate has been approved for the MCM program on a prior version of the product, he/she will need to reapply and meet all prerequisites for the new version.

Pricing

Full rotations with exams:

- Nonrefundable program application fee: US\$125
- Program fee: US\$18,500 for all programs except MCM: Windows Server 2008 R2: Directory, which has a fee of US\$13,950. Pricing includes first attempt for each required exam.

Exam retakes (for those who do not pass the exams on the first attempt):

- Knowledge Exams: US\$250 each
- Qualification Lab Exam: US\$2,500

Upgrade rotations with exams:

- Nonrefundable registration fee: US\$125
- Microsoft Exchange Server: US\$7,500
- Microsoft Lync Server and SharePoint Server: US\$13,950

Upgrade exams only (without rotation attendance):

- Nonrefundable registration fee: US\$125
- Knowledge Exams: US\$250 each
- Qualification Lab Exam: US\$2,500

Note As a benefit of MCM certification, current MCMs can attend a full training rotation of the technology in which they are certified at the upgrade rotation price.

Note Requirements have changed for MCM: SQL Server 2008 and for MCM: Exchange Server 2010, and training is optional.

Q. I am having a hard time justifying the ROI of getting an MCM to my management. Can you help?

Q. As a Microsoft Certified Partner, can I expect my billable rate to increase after I earn an MCM and/or MCA certification?

Q. Is the MCM program just a "boot camp" where I will learn everything I need in order to receive the certification?

Q. I am a seasoned consultant with extensive expertise on Microsoft Exchange Server, Microsoft SQL Server, or Windows Server: Directory, but I am not a Microsoft Certified Professional. May I take the MCM training?

Q. This sounds like the program called Ranger. Are the two programs related?

Q. Is training for MCM offered outside of Redmond, Washington, in the United States?

Q. How has the program changed for Microsoft SQL Server 2008?

Q. How has the program changed for Microsoft Exchange Server 2010?

Q. Is the program offered in languages other than English?

Q. Can I test out of the training and go straight to the exams?

Q. What is the average experience level of a candidate who is accepted into the MCM program?

Q. Do I need to bring my own equipment to the training rotation?

Q. What type of lab environment is used for training?

Q. How many candidates are in each training rotation?

Meet the Microsoft Certified Masters and Microsoft Certified Architects

Microsoft has a significant community of Microsoft Certified Masters (MCMs) and Microsoft Certified Architects (MCAs). Those who hold these industry-leading certifications live and work in many countries and regions, including the United States, Europe, Latin America, and Asia Pacific. All have varied backgrounds, interests, and extensive experience.

Consider connecting with these MCMs and MCAs for help with your project. We add names regularly—so check back again for opportunities to connect with someone in your region.

Note The following lists are sorted by area, country/region, name, and company. Individuals have agreed to be listed here; therefore, the lists do not represent the complete MCM and MCA communities.

Breadth tracks*:

- [Infrastructure](#)
- [Solutions](#)

* Although Microsoft discontinued offering new Review Boards for the breadth Architect tracks (Infrastructure and Solutions), they remain valid Microsoft certifications. The individuals who have earned these certifications are listed below.

Depth tracks:

- [Microsoft Exchange Server](#)
- [Microsoft Lync Server 2010](#)
- [Microsoft SharePoint Server](#)

- [Microsoft SQL Server](#)

Microsoft Certified Masters – Windows Advanced Infrastructure

The MCM Advanced Infrastructure track was not brought to market. However, many people went through the program in its alpha and beta stages and successfully passed the written exams and lab exam, and therefore earned this certification.
